Portfolio: <https://trevorsmithbanjo.github.io/>

Full Stack Web Developer with an extensive background in the music industry. Graduate of the University of Texas Coding Boot Camp with skills in HTML, CSS, JavaScript, and MERN stack. As a Grammy nominated musician I understand the importance of mastering skills through practice and perseverance. I've found similarities between coding and learning an instrument, as they are both challenging yet every small victory is more rewarding than the last. I am now able to apply this passion to my work as a programmer. Eager to combine my background in music with my technical skills to help the developer team build, test and deploy high quality products.

TECHNICAL SKILLS

Frontend: HTML5, CSS, JQuery, Javascript, Bootstrap, AJAX, TailwindCSS

Backend:

PROJECTS

Rescue "Spot"

Role: Main UI features and

API functionality

Repo: <https://github.com/dcastelline/Project-1-Rescue-Spot>

Link: <https://dcastelline.github.io/Project-1-Rescue-Spot/>

- An app to help you find your new dog
- With a focus on connecting the user to local organizations and resources for adopting dogs in need of a home.
- Tools/Languages: HTML, CSS, Materialize, Javascript, jQuery, AJAX, RESTful API's

Weather Dashboard

Repo: <https://github.com/trevorsmithbanjo/Weather-Dashboard>

Link: <https://trevorsmithbanjo.github.io/Weather-Dashboard/>

- A weather app for a user planning to travel
- This weather app is geared toward a user planning a trip. The user can search by city and get the current weather conditions as well as a 5-day forecast.
- Tools/Languages: HTML, CSS, Bootstrap, Javascript, jQuery, AJAX, OpenWeather API

Code Quiz

Repo: <https://github.com/trevorsmithbanjo/code-quiz>

Deployed: <https://trevorsmithbanjo.github.io/Weather-Dashboard/>

- A timed javascript quiz for the budding coder.

- The application is a timed quiz of javascript questions. The page has a smooth feel with a dynamically rendered UI using JQuery and javascript.
- Tools/Languages: HTML, CSS, Bootstrap, Javascript, jQuery

WORK EXPERIENCE

Wood & Wire

3/2012 - 9/2020

Co-owner

Austin, TX

- Determined founding member of the Grammy nominated bluegrass band. As a Co-owner I helped build this band from a small following in Austin, Texas to a national touring band playing major festivals and venues.
- Hardworking member of a team with a rigorous travel schedule playing 150 dates a year nationwide all while writing and recording new albums.
- A self-starter who overhauled merchandising and more than doubled the profits in a 3 month period. This resulted in the company hiring a merchandising lead, which garnered more profitability for the company.

Green Mountain Grass

2/2007 - 2/2011

Music Performance

Austin, TX

- Energetic team member joining the national touring band, of whom I knew none of the members, on their hardworking schedule of 250 dates a year.
- Passionate and attentive I had to learn a large repertoire of material in a short period of time. This role taught me a lot about working as a group and contributing to the growth of the project.

EDUCATION

University of Texas, Austin

Graduate March 2021

Full Stack Web Development Bootcamp Certificate
